Auditing at Scale is Broken

Organizations with multiple locations face compounding inefficiencies that erode compliance standards and drain operational resources.

Paper-Based Chaos

Spreadsheets, PDFs, and email threads create data silos and version control nightmares across locations.

Delayed Corrective Actions

Non-conformances get lost in email chains.
Resolution times stretch from days to months.

Zero Visibility

Area managers and leadership have no real-time view into compliance status across their portfolio.

Scheduling Bottlenecks

Coordinating auditors, sites, and campaign timelines manually is error-prone and time-consuming.

THE SOLUTION

One Platform. Complete Control.

PROOF replaces fragmented tools with a unified audit management ecosystem — from campaign planning to corrective action closure.

Digital Audits

Configurable templates with scoring, evidence capture, and mobile-first execution.

Corrective Actions

Auto-generated action plans from audit findings with severity-based SLAs.

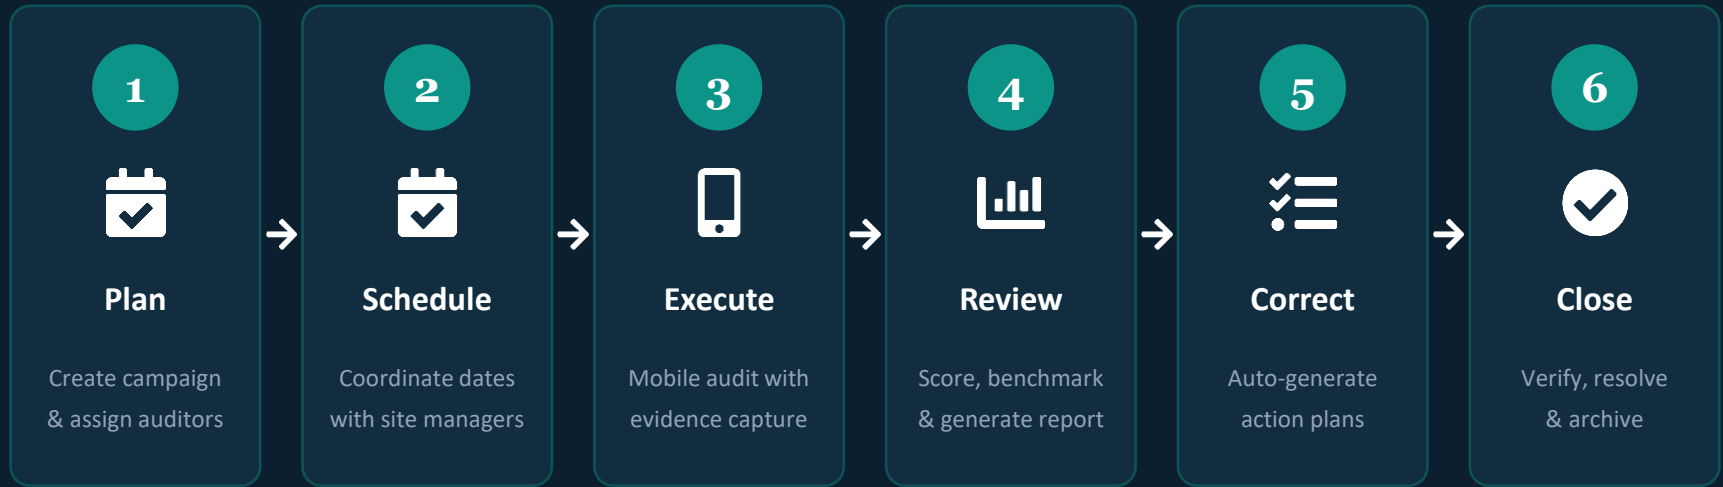

Compliance Intelligence

Real-time dashboards, trend analysis, and benchmarking across your portfolio.

The PROOF Audit Lifecycle

From campaign launch to corrective action closure — every step tracked, every finding actionable.

60%

faster audit cycles

100%

digital evidence trail

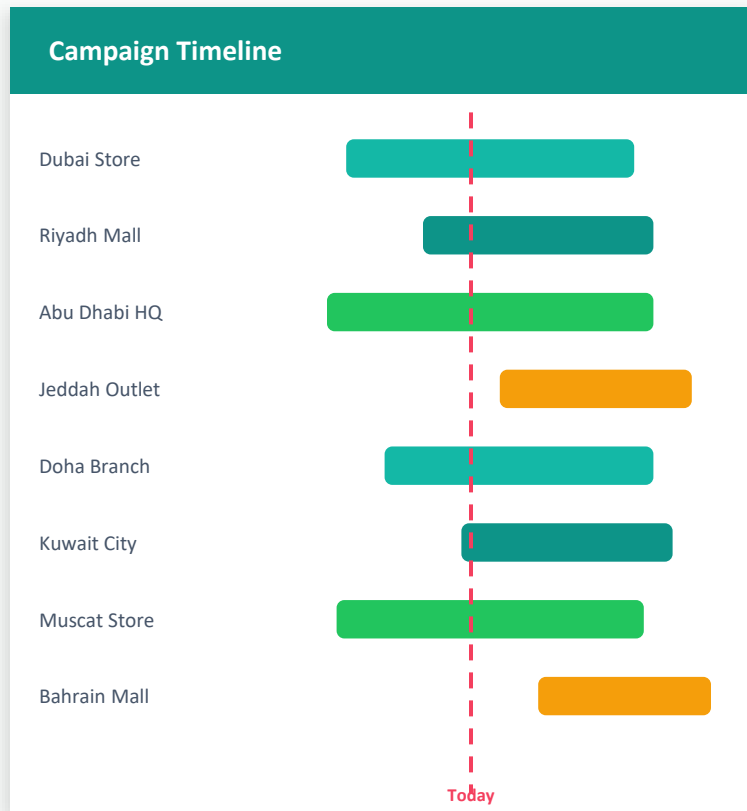

3X

faster CAPA resolution

Plan, Launch & Track Audit Campaigns

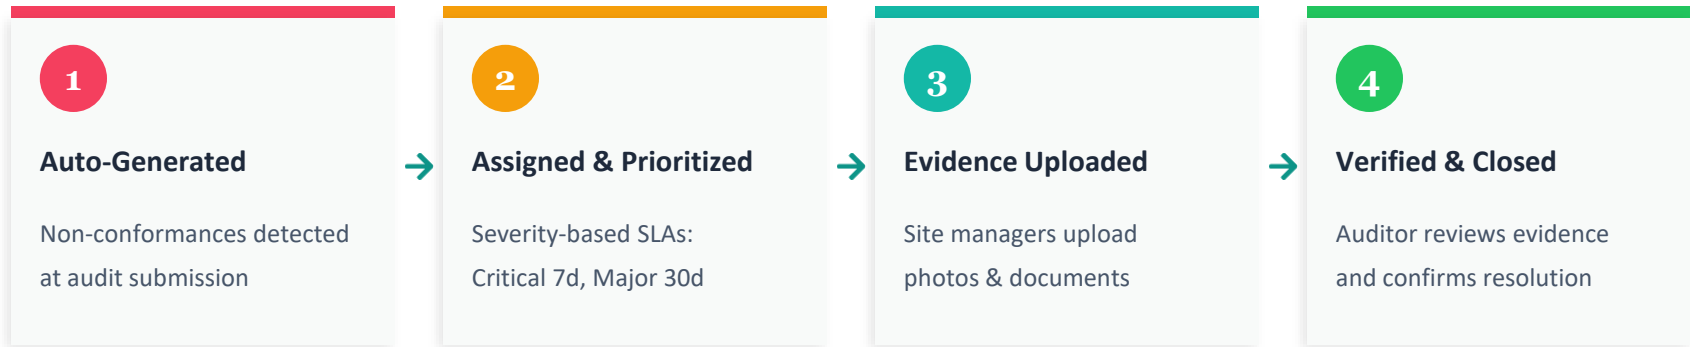

Roll out audits across hundreds of sites with a single campaign.
Define templates, set timelines, and let PROOF handle the rest.

- ✓ Template-based campaign creation
- ✓ Bulk auditor assignment
- ✓ Interactive Gantt timeline view
- ✓ Blackout date management
- ✓ Site acknowledgment workflow
- ✓ Real-time completion tracking

From Finding to Fix — Automatically

Every audit non-conformance instantly becomes a tracked corrective action with severity-based deadlines, assigned owners, and evidence requirements.

Every finding is linked to the original question, score gap, and evidence — full traceability from audit to resolution.

Tailored for Every Role

Each user sees exactly what they need — no clutter, no confusion.

Admin / Area Manager

- ✓ Full campaign oversight
- ✓ Organization analytics
- ✓ User & site management
- ✓ Cross-region benchmarks

Site Manager

- ✓ Own-site audit view
- ✓ Schedule proposals
- ✓ CAPA management
- ✓ Self-assessment tools

Auditor

- ✓ Assigned audits queue
- ✓ Mobile audit execution
- ✓ Evidence capture
- ✓ Accept/decline workflow

+ Super Admin dashboard for multi-tenant platform management

Reporting Capabilities

- ✓ Executive compliance summary
- ✓ Section-level score breakdown
- ✓ Historical trend analysis with deltas
- ✓ Area & regional benchmarking
- ✓ Non-conformance severity analysis
- ✓ PDF export and email distribution
- ✓ Points-lost analysis by question
- ✓ Evidence count per audit

Enterprise-Grade. Cloud-Native.

Role-Based Access

Five-tier permission model with region, area, and site scoping.

Data Isolation

Multi-tenant architecture with organization-level Firestore security rules.

Cloud-Native

Built on Google Cloud / Firebase for 99.99% availability and global scale.

Mobile-First

Responsive design for field auditors. Works on any device, any browser.

Real-Time Notifications

Email + in-app alerts for assignments, submissions, and CAPA updates.

Multi-Region Ready

Support for global teams across EMEA, NA, APAC with timezone handling.

Simple, Per-Site Pricing

Unlimited users on every plan. Pay per site, not per seat — so your whole team can participate without added cost.
